Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,7,8,10,12 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Davis et al. Regarding claims 1 and 12 , Davis et al disclose a connector pair comprising: an over-molded connector 66, comprising: at least one first terminal at 80 having a first terminal sex; at least one wire (not shown) respectively coupled for electrical communication with each of said at least one terminals; and an overmolded body 70, having an overmolded connector terminal end, an overmolded connector wire end and an overmolded connector outer surface, said overmolded body at least partially encasing said at least one terminal and said at least one wire; a hardshell shroud 68 having a first connector sex, said hardshell shroud comprising: a substantially rigid shroud body having a shroud terminal end 72, a shroud wire end 76, and shroud inner and outer surfaces; wherein said overmolded connector is contained within said hardshell shroud; a hardshell connector housing 12 having a second connector sex, said hardshell connector housing comprising: at least one second terminal 14 having a second terminal sex; a substantially rigid connector body having inner surface 52 and outer surfaces (not numbered); wherein said hardshell shroud 68 may be interengaged

with said hardshell connector 12, such that said at least one first terminal 80 engages respective ones of said at least one second terminal 16.

Regarding claims 7,8 and 28, Davis et al. disclose the shroud 66 and the connector body having an asymmetrical polarizing shape (as shown in figs. 7 and 1 respectively).

Regarding claim 10, Davis et al. disclose the shroud having a latching feature 110.

Allowable Subject Matter

Claims 20, 21,23-26 and 30 are allowed.

Claims 2,3,6, 9,11,13-19, 29, 31 and 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed November 6, 2003 have been fully considered but they are not persuasive. In response to applicant's argument that the Davis reference does not teach overmolding *directly over the wire*", the Examiner replies that applicant's claim recites an "overmolded body at least partially encasing said at least one terminal and said at least one wire", which is disclosed by Davis. In response to applicant's other argument's the examiner agrees with applicant.
